

CLASSIC FIBTM GF6

Mortar Glass Fibre for Plastering

Product:

Classic Fib GF6 glass fibre of around uniform 6mm length will disperse in mortar.

Description:

Classic Fib GF6 glass fibre of around 6mm length will evenly disperse in mortar and develop secondary reinforcement-micro (MSR Plaster). It encourage resistance to crack impact and uniformity. It increase quality, durability and service life of concrete. The glass fibre is eco-friendly strength enhancer and increase the toughness of mortar.

Purpose & Uses:

Classic Fib GF6 is used in plaster and other cement construction application.

- Used to prevent shrinkage, shelf life of structure and shape, lakhs of dispersed glass fibre will give the mortar a potent strength.
- Used to prevent deterioration of steel.

Pack & Dosage:

Classic Fib GF6 is available in 60 gms pouch. One pouch (60 gms) is recommended for one bag (50kg) of cement.

Properties:

Evenly toned 6 mm micro glass fibre with efficient property to disperse evenly in mortar.

Advantages:

- Prevents cracks (60% to 70%).
- Encourage better binding and anchoring of mortar.
- Elevate strength and increases durability.
- Increase water proofing but reducing permeability.
- Increase durability of building.
- Maintenance Free.

CLASSIC FIBTM GF6

Mortar Glass Fibre for Plastering

Instruction to Use:

One pouch (60 gms) with one bag (50 kg) of cement for plastering. After achieving consistent mix in mortar add **Classic Fib GF6** and mix it for 2 to 4 minutes to get uniform dispersion and avoid aggregation of glass fibre.

Other Fibre Products:

Following are our other Fibre products.

- Classic Fib CF
- Classic Fib GF12
- Classic Fib GF24
- Classic Fib Mesh100
- Classic Fib Mesh142
- Classic Fib Mesh1000
